Momin Ejaz

Software Developer | Systems Design | Project Controls Technology

Alberta, Canada | momin_e@hotmail.com

PROFESSIONAL SUMMARY

Software and systems professional with experience across construction, manufacturing, accounting workflows, and operational reporting. Develops applications and automation that connect source data, business rules, exception review, and traceable outputs. Combines full-stack development and project-controls knowledge with independent mobile and learning-platform projects.

TECHNICAL SKILLS

- **Applications:** Python, TypeScript, JavaScript, React, FastAPI, Fastify, SQL, REST APIs; Flutter/Dart through QuietPage and Next.js through the Lumber Training Portal.
- **Data and automation:** pandas, openpyxl, Excel/VBA, Power BI, DAX, Playwright, SAP upload preparation, reconciliation, and source validation.
- **Cloud and delivery:** Azure App Service, Azure SQL, Microsoft Entra ID, GitHub Actions, testing, deployment preparation, and user support.
- **Domain:** Construction project controls, equipment accounting, workflow design, stakeholder requirements, and manufacturing systems.

PROFESSIONAL EXPERIENCE

Graham Construction Inc. - Software Developer / Systems & Project Controls Lead

Calgary / Edmonton, Alberta | October 2020-Present

- Developed an equipment inventory portal with scoped project and yard verification, exception routing, sign-off snapshots, audit history, and campaign reporting, supported by Python source-file preparation tools.
- Built equipment-accounting and subtrade Daily Log applications with validated workbook imports, controlled editing, user permissions, source traceability, and SAP/Excel output workflows.
- Automated equipment journal-entry preparation and reconciliation using Python, pandas, and openpyxl, including WBS mapping and review reports for skipped or unmapped records.
- Created a weekly equipment utilization tool combining fleet workbooks with equipment readings, data-quality checks, exceptions, and documented overrides.
- Developed and troubleshot Power BI/DAX reporting for labour, subcontractor hours, progress, and cost visibility; audited an SAP/InEight model for calculation and filter-behavior risks.
- Automated invoice and client-portal processing using Python and browser automation.

MeTech Consulting Inc. - Freelance Software Developer

Greater Calgary Metropolitan Area | May 2013-Present | Freelance

- Meet with prospective clients to understand software needs and define project proposals and scope.
- Coordinate requirements and proposed solutions with the software team; oversee projects and maintain schedules.
- Negotiate contract terms, conditions, and costs based on project scope.

EXPERIENCE / CONTINUED

Pine Profiles Inc. - Systems Development & Automation

Creston / Vancouver, British Columbia | April 2018-October 2020

- Designed a FileMaker inventory platform for purchasing, sales orders, and stock tracking, with barcode-based shipment entry.
- Built Arduino and servo-based precision trim controls for sawmill operations and developed costing tools and Power BI analysis to compare production costs with sales prices.

Quinn Contracting Inc. - Cost Coordinator

Chetwynd, British Columbia | July 2017-September 2017

- Supported cost reporting, LEM validation, rates, forecasts, accruals, budgets, and planning inputs.
- Built automated data-entry and reporting tools and Power BI views for costs, purchase orders, manpower, and progress.

Husky Energy - Systems Developer

Calgary, Alberta | April 2015-August 2015

- Built VBA and Microsoft Access tools to track turnover records, punch items, checksheets, and system status, with QR-based record tracking.

Husky Energy - Development / Reservoir Engineering Co-op Intern

Calgary, Alberta | Summers 2013 and 2014

- Automated AccuMap-to-OFM data transfer with Python, analyzed SAGD project analogues, and configured OFM monitoring reports.

INDEPENDENT PROJECTS

QuietPage - Flutter / Dart | Android MVP

- Developed an offline reading and listening application supporting web URLs, EPUB, plain text, HTML, clipboard text, and DOCX documents.
- Implemented reading progress, bookmarks, configurable text-to-speech, background media controls, and portable backup/restore, supported by parser and widget tests and Android release-build preparation.

Lumber Training Portal - Next.js / SQLite | Local proof of concept

- Built administrator and learner workflows for structured courses, assignments, progress tracking, feedback, reporting, and local media uploads.
- Added authenticated media access and created an animated lesson and narrated workflow demonstration for stakeholder review.
